## Clarification 1: Release Families

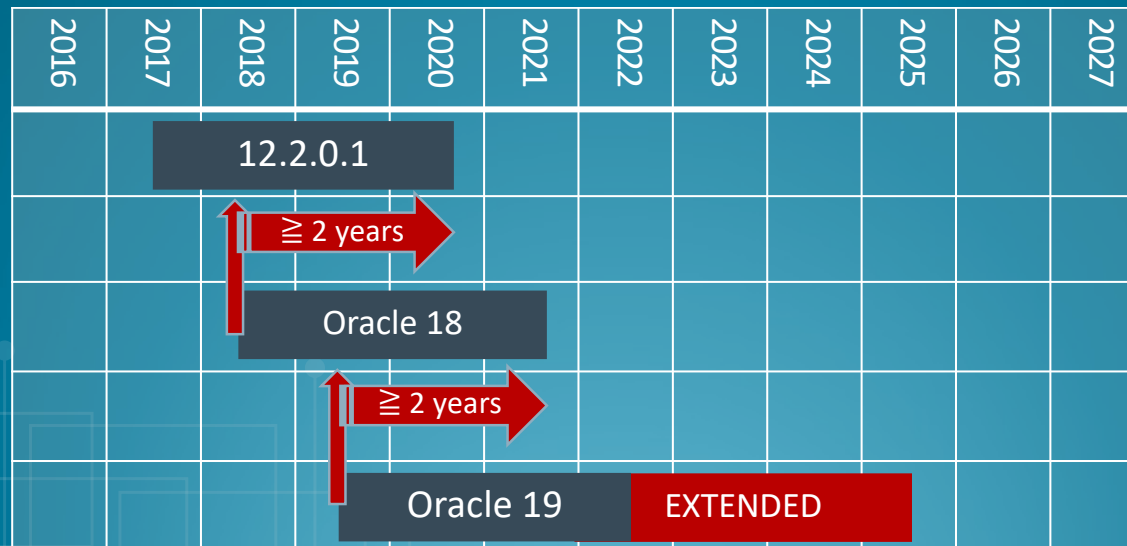

- The 18c and 19c releases are part of the Database 12.2 "Family" for Lifetime Support as if they were the 12.2.0.2 and 12.2.0.3 patch sets
- Patching end date for Oracle Database 12.2.0.1 will be determined once Oracle 18c is available on premises

2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2027

		12.2.0.1									
			Oracle 18								
				Oracle 19		EXTENDED					

"Dates" are fictional - see MOS 742060.1 for announcements

## Clarification 2: Support for Annual Releases

- Annual releases get a minimum of 2 years patching after the succeeding release is available on all enterprise (non-Engineered Systems) platforms
- Similar to what patch sets received under the previous release model

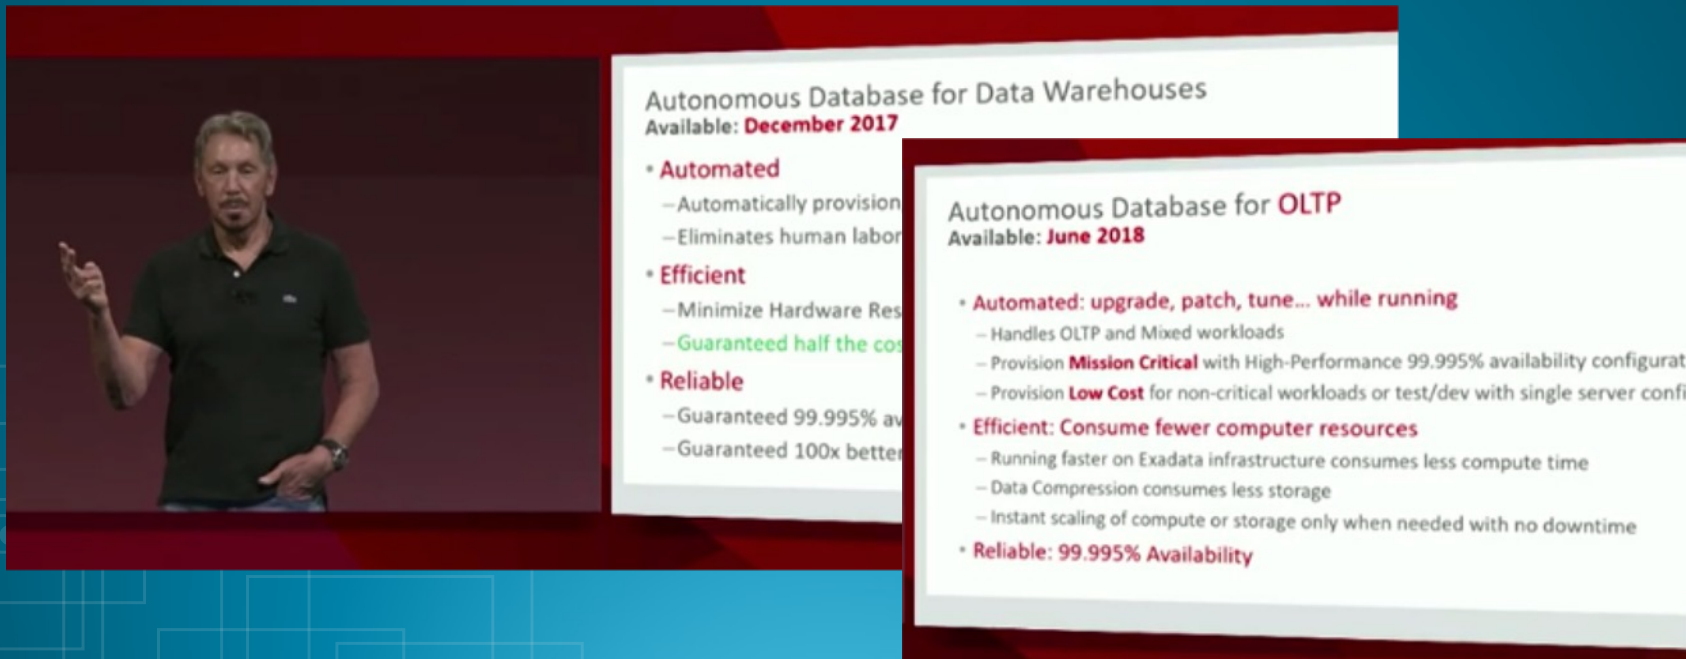

## Clarification 3: Long-Term Support Release

- The final release in a family will get longer term support
- Please check MOS Note 742060.1 for details

## Patching Example with Oracle 18c: Release Numbering

# Version number reflects patch level!

A Release **Update** or **Revision** is only a patch,  
not a database upgrade!

**Patch:**  
opatch

Oracle 18.2.1 → Oracle 18.6.0

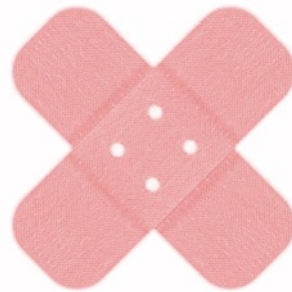

**Upgrade:** Oracle 18.2.1 → Oracle 19.1.0  
dbupgrade and DBUA

# Oracle 12.2: Use Updates

## Oracle 12.1: Use Bundle Patches (BP)

~~Don't use Oracle 11.2 Patch Set Updates (PSU)~~ **Upgrade NOW!**

# Choices and Recommendations

What are your choices, what do we recommend?

## Which approach is the best? Update vs Revision

Production	April	July	October	January	April
18.1.0	18.2.0	18.3.0	18.4.0	18.5.0	18.6.0
		18.2.1	18.3.1	18.4.1	18.5.1
			18.2.2	18.3.2	18.4.2
					
Production	April	July	October	January	April
18.1.0	18.2.0	18.3.0	18.4.0	18.5.0	18.6.0
		18.2.1	18.3.1	18.4.1	18.5.1
			18.2.2	18.3.2	18.4.2

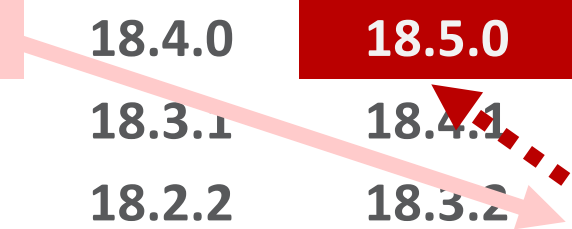

This is possible ...

Production	April	July	October	January	April
18.1.0	18.2.0	18.3.0	18.4.0	18.5.0	18.6.0
		18.2.1	18.3.1	18.4.1	18.5.1
			18.2.2	18.3.2	18.4.2

Production	April	July	October	January	April
18.1.0	18.2.0	18.3.0	18.4.0	18.5.0	18.6.0
		18.2.1	18.3.1	18.4.1	18.5.1
			18.2.2	18.3.2	18.4.2

But this isn't ...

Production	April	July	October	January	April
18.1.0	18.2.0	18.3.0	18.4.0	18.5.0	18.6.0
		18.2.1	18.3.1	18.4.1	18.5.1
			18.2.2	18.3.2	18.4.2

## Our Recommendation!

Production	April	July	October	January	April
18.1.0	18.2.0	18.3.0	18.4.0	18.5.0	18.6.0
		18.2.1	18.3.1	18.4.1	18.5.1
			18.2.2	18.3.2	18.4.2

- Oracle recommends that customers stay current with **Updates**
  - Minimize the chance of encountering known bugs and security vulnerabilities
  - Reduce the likelihood of requiring separate interim one-off patches or merge patches
- Customers in a stable state may choose to be conservative and adopt revisions
  - Security and regression fixes will be current
  - Functional and performance fixes will lag behind updates by 3 or 6 months
  - Higher chance of hitting known issues that are already fixed in a more recent update

# Upgrades and Downgrades

- Applies to non-CDBs and CDBs
  - One exception:  
No downgrade back to 12.1.0.1 for Multitenant
- Valid for all Updates and Revisions

# When will Oracle Database 18c be available on premises?

- See MOS Note:742060.1:

**13 Oracle Database 18c** is expected to be available for on-Prem platforms (non-Engineered Systems) with the **July 2018 Release Update**

- **Future Oracle Database releases** are planned for the other platforms but due to Oracle's revenue recognition policy we are unable to publish those schedules at this time. This schedule only includes releases which have already been released on at least one platform.
